November 28, 1958

Dear Sir:

Subject: Contract EN-95
Final Patent Report

This is intended to be a final patent report as required by Clause No. 13 of the subject contract. All creative work has been completed, and we have reviewed the work accomplished with our engineering personnel involved. In our opinion, there were no subject inventions.

As you know, we issued a subcontract under this prime (our G-13763) for a small portion of the development work. We have received for our files a statement from that contractor to the effect that there were no subject inventions as a result of his efforts.
